

Emergency Public Notice

We are currently planning to do another badly needed repair to our main 24" waterline coming into the City of Graham. **We plan to do this repair on Wednesday, May 13th (Tomorrow)**. We anticipate the repair will take 6-9 hours. **An Emergency enactment of Stage 5 Water Emergency under our Drought Contingency Plan from Now, May 12, 2020 until the leak is repaired is currently in place**. This a mandatory request to conserve water and only use for essential purposes. During this time we will top off all the tanks in town and limit flows to ensure water service for essential need will not be disrupted during this repair. Sorry for the late notice but this is an immediate need repair. As long as we conserve water, all of Graham will continue to have water during this period. We ask for everyone's cooperation during this time and hope the repair goes smooth. If you have questions or concerns please contact **City Hall** at **940-549-3322**
