

City of Graham

### Public Notice

**Update-**We are working on finding a storage system that will allow Spivey Hill residents to have water during the repair. All details will be announced on Thursday, March 5<sup>th</sup> at the City Council meeting and put out through social media immediately after.

We are currently planning to do a badly needed repair to our main 24" waterline coming into the City of Graham. As long as weather permits we plan to do this repair on Monday, March 9<sup>th</sup>. We anticipate the repair will take 10-16 hours. Final call for the repair will be made at the March 5<sup>th</sup> City Council meeting at which time the City Council will enact a Stage 4 Water Emergency under our Drought Contingency Plan from March 5, 2020 until the leak is repaired. This a mandatory request to conserve water and only use for essential purposes. During this time we will top off all the tanks in town and limit flows to ensure water service for essential need will not be disrupted during this repair. All of Graham with the exception of Spivey Hill will continue to have water during this period. Our apologies to the Spivey Hill residents who will be without water on March 9 due to the proximity to the repair. Water pressure could be low during this repair. We ask for everyone's cooperation during this time and hope the repair goes smooth. If you have questions or concerns please contact City Hall at 940-549-3322
