

Burn Out Notification

Annual Disinfection

**The burnout process is scheduled for
November 8th thru November 26th, 2021**

The only disinfectant in the treated water during this 3-week period will be free chlorine. During this time the chlorine residual will be elevated but still within TCEQ requirements and will give the water a chlorine odor. This process will also cause some of the biofilm to break free and discolor the water due to our older infrastructure. We will be flushing the system as this burn out processes through the system, if you are experiencing any discoloration, please contact City Hall. Though there will be a chlorine odor to the water, the water will remain safe. We ask that both our customers and those consumers that our customers serve remember that this is a temporary measure and that this process is necessary in order to continually provide consumable water. TCEQ has approved the burnout process.

Please contact City Hall with questions 940-549-3322
